

KOMERCIJALNA BANKA AD BEOGRAD

CONSOLIDATED FINANCIAL STATEMENT

OF THE GROUP KOMERCIJALNA BANKA AD BEOGRAD AS OF 30/06/2012

August, 2012

Summary of Item 2. – Consolidated financial statement of the Group Komercijalna banka AD Beograd as of 30/06/2012

The afore-mentioned Statement is submitted to the Board of Directors of the Bank, in accordance with Article 73 of the Law on Banks and in accordance with Article 27 of the Bank's Statute.

Pursuant to Article 27 of the Bank's Statute, the Board of Directors adopts the semiannual reports on the Bank's operations from the Executive Board.

- The Group Komercijalna banka AD Beograd is composed of:
 - Komercijalna banka AD Beograd – as a parent bank
 - Komercijalna banka AD Budva – as a Group member
 - Komercijalna banka AD Banja Luka – as a Group member
 - Investment funds management company KomBank INVEST AD Beograd – as a member of the Group.
- Consolidation of financial statements of the Group Komercijalna banka has been conducted in accordance with the Law on Accounting and Audit and IAS 27 – “Consolidated and stand alone financial statements”, as well as the Instructions for Preparation of Consolidated Financial Statements.
- Subordinated banks: Komercijalna banka AD Budva and Komercijalna banka AD Banja Luka keep accounting books and prepare financial statements in accordance with the accounting regulations of the Republic of Montenegro and Republic of Srpska, whereas KomBank INVEST AD Beograd complies with the regulations that govern such business activities in the Republic of Serbia. For the purpose of preparing consolidated financial statements, stand-alone financial statements from subordinated banks and KomBank INVEST have been adjusted to the accounting regulations of the Republic of Serbia for the purpose of presenting them.
- For the purpose of preparing consolidated financial statements, Komercijalna banka AD Beograd, as the parent bank, has reclassified, adjusted and consolidated the financial statements from the Group members to match its stand-alone statement.
- In preparing the consolidated financial statements, the method of full consolidation was applied. This means that consolidation was carried out by aggregating all identical items of assets, liabilities, share capital, revenues and expenditures, and by excluding all values included in stand-alone accounts, which arise from mutual relations of the Group members.
- The following have been fully eliminated from consolidation:
 - the amount of the parent bank's share in the capital of subordinated members,
 - internal receivables and payables among all Group members,
 - internal revenues and expenditures among all Group members,
 - accrued unrealized internal profit, and
 - accrued unrealized internal losses.

As financial statements of the Group Komercijalna banka have been consolidated on the basis of stand-alone financial statements, in accordance with the Law on Accounting and Auditing and IAS 27 – “Consolidated and stand-alone financial statements”, the Law on Capital Market and regulations by the National Bank of Serbia, it is proposed to the Board of Directors to adopt the draft Consolidated Statements of the Group Komercijalna banka AD Beograd as of 30/06/2012.

5	FX RISK RATIO	MAX 20%	19.66%	18.86%	19.93%	19.73%	19.80%

CAPITAL ADEQUACY

Capital adequacy ratio is the key indicator of the Group's operations and its level is influenced by:

- level of regulatory capital,
- total credit risk-weighted assets,
- "net open FX position" and
- exposure to operating risk.

FX RISK RATIO

LARGE EXPOSURE RATIO

According to the Law on Banks: "For a banking group on consolidated basis the following shall be determined:

- capital adequacy ratio,
- large exposure,
- investment in other legal entities and in fixed assets,
- open net fx position. "

The Group Komercijalna banka meets the prescribed ratios on consolidated basis:

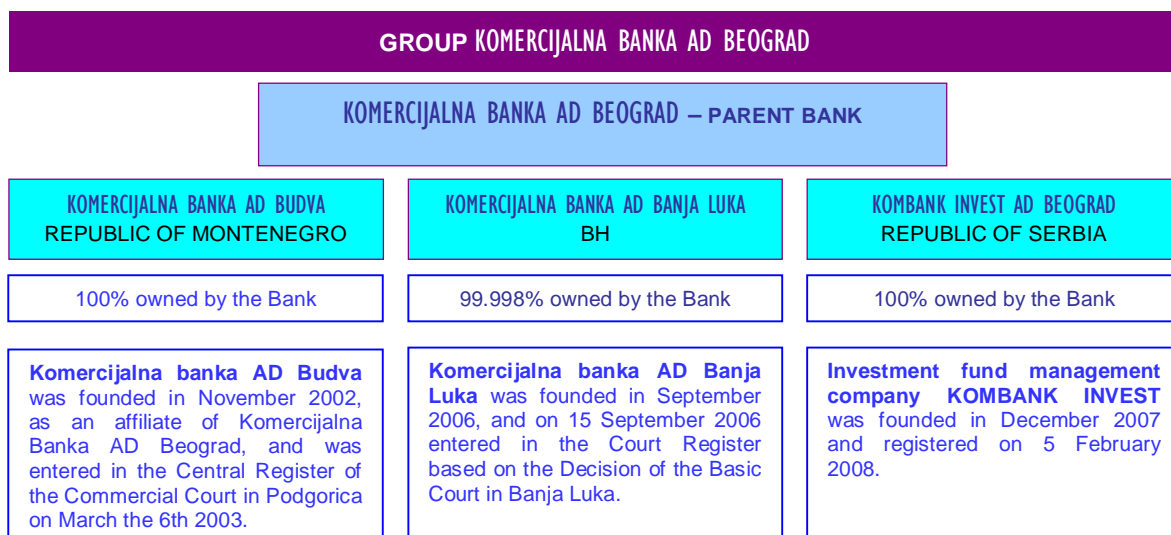

No.	Performance indicator	Prescribed value	30.06.2012.	31.12.2011	31.12.2010	31.12.2009	31.12.2008
1	2	3	4	5	6	7	8
1.	Capital adequacy (2/3)	min. 12 %	16.93	18.27	18.73	15.80	14.70
2.	Bank's investment into entities outside the financial sector and into fixed assets (4/2)	max. 60%	22.70	23.85	18.83	29.60	33.36
3.	Exposure to entities related to the Bank (5.2/2)	max.20%	2.20	2.10	1.63	11.26	11.49
4.	Sum of large exposures of the Bank (5/2)	max.400%	119.41	92.86	61.24	87.78	71.04
5.	FX risk ratio (6/2)	max.20%	19.66	18.86	19.93	19.73	19.80

4. CONSOLIDATED BALANCE SHEETS OF THE GROUP KOMERCIJALNA BANKA AD BEOGRAD

Subordinated banks: Komercijalna banka AD Budva and Komercijalna banka AD Banja Luka keep their business books and prepare financial statements in accordance with the regulations of the Republic of Montenegro and Bosnia and Herzegovina, respectively.

For the purpose of preparing the consolidated financial statement, individual financial statement of the subordinated banks and the Company have been adapted to financial statement presentation that reflects:

- accounting regulations of the Republic of Serbia,
- internal by-laws of the Parent Bank - Komercijalna banka AD Beograd and
- relevant IAS and IFRS.

Functional currencies, the EURO from the financial statements of Komercijalna banka AD Budva and the BAM from the financial statements of Komercijalna banka AD Banja Luka, have been converted to the reporting currency of the Parent bank, or the functional currency of the Parent bank – the Dinar (RSD) on the basis of the officially published exchange rates in the Republic of Serbia, namely:

- Income Statement and Cash Flow Statement by applying average exchange rate in the Republic of Serbia, and
- Other financial statements (Balance Sheet and Statement of Changes in Equity) by applying the closing exchange rate as at the balance sheet date.

In the conducted consolidation procedure the following have been fully consolidated:

- the amount of the parent bank's share in equity of the subordinated banks and the Company at the initial exchange rate of the investment (RSD 5,480.9 million),
- internal receivables and liabilities between the Group members (RSD 444.0 million),
- internal income and expenses between all Group members (net positive effect RSD 25.8 million),
- unrealized internal gains (not achieved) and
- unrealized internal losses (not achieved).

In the conducted consolidation procedure the Group's capital increased by unrealized gains from currency conversion in foreign transaction to the amount of RSD 1,493.8 million (of which the amount of gains from currency conversion of permanent investment in Group members account for RSD 1,383.5 million, not recognized in stand-alone financial statements of the parent bank).

Work organization of the Group and Risk Management Policies adopted by the Board of Directors of the parent bank established the rules and procedures of risk management. Risk Management Policies defined the key principles and aims in managing individual types of risk which the Group is exposed to in the course of its operations as well as the system of managing such risks. Consolidated risk management report is presented separately.

Impairment of loans (loan loss provision) of the members of the Group, as well as provisioning for contingent liabilities have been recognized in accordance with IAS 39 and IAS 37, according to the adopted internal methodology of the Group.

Komercijalna banka AD Banja Luka	3,849,015	926,562	2,922,453	1.5%
KomBank INVEST AD Beograd	200	200	-	-
TOTAL	199,208,903	1,853,524	197,355,379	100.0%

The percentage of total consolidated items in the Balance Sheet is not materially significant and accounts for 1.8% of balance-sheet total in the joint Balance-Sheet and 0.9% of joint off-balance sheet.

The share of subsidiaries in the total potential of the Group is not significant as it accounts for only 7.8% of consolidated assets of the Group. Liabilities are lower by 5.8%, as the capital invested into subsidiaries by the Parent Bank is deleted in the process of consolidation.

As in previous years, the Parent Bank dominates the structure of all items of the Group, accounting for more than 92%.

NOTES

TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR 30.06.2012

Belgrade, August 2012

1. ESTABLISHMENTS AND OPERATIONS OF THE BANKING GROUP

Komercijalna Banka AD Beograd (hereinafter „the Parent Bank“) was founded on December the 1st 1970, and was transformed into a limited company on May the 6th 1992.

As at June the 30th 2012, the following shareholders held the major controlling stakes in the parent bank:

1. The Republic of Serbia
2. EBRD, London and
3. ARTIO INT. EQUITY FUND, New York

The capital structure review is provided in the Note no. 4

The Parent Bank owns three dependent entities with the following shareholder ownership:

- 100% - Komercijalna Banka AD Budva, Montenegro
- 100% - KomBank INVEST AD Beograd, Serbia
- 99,998% - Komercijalna Banka AD Banja Luka, Bosnia and Herzegovina.

Minority shareholder in Komercijalna Banka AD Banja Luka, holding 0,002%, is the Export Credit and Insurance Agency of the Republic of Serbia.

The consolidated financial statements and notes to financial statements present information of Komercijalna Banka AD Beograd as the Parent Bank, Komercijalna Banka AD Budva, Komercijalna Banka AD Banja Luka and the Investment Fund Management Company KomBank INVEST AD Beograd (hereinafter „the Group“).

Komercijalna Banka AD Budva was founded in November 2002, as an affiliate of Komercijalna Banka AD Beograd, and was entered in the Central Register of the Commercial Court in Podgorica on March the 6th 2003.

Komercijalna Banka AD Banja Luka was founded in September 2006, and was entered into the Court Register on September the 15th 2006 in accordance with the Decision of the Basic Court in Banja Luka.

Investment Fund Management Company KomBank INVEST AD Beograd was founded in December 2007 and registered on February the 5th 2008.

Activities of the Group include credit, deposit and guarantee operations, operations of national and international payment transactions in accordance with the Law on Banks, as well as the operations related to the investment fund management. The Group is committed to operate according to the principles of liquidity, security and profitability.

As at June the 30th 2012, the Group consists of the Head Office and seat in Belgrade, 14 Svetog Save St, the seat of Komercijalna Banka AD Budva in Budva, the seat of Komercijalna Banka AD Banja Luka in Banja Luka, the seat of Investment Fund Management Company KomBank INVEST AD Beograd in Belgrade, 40 branches and 243 outlets in the territories of Serbia, Montenegro and Bosnia and Herzegovina.

On June the 30th 2012, the Group had 3.266 employees and on December the 31st 2011, it had 3.282 employees.

2. THE BASIS FOR PREPARATION AND PRESENTATION OF THE FINANCIAL STATEMENTS

2.1. The Statement of Compliance

Members of the Group kept their business books and prepared individual financial statements as of June the 30th 2012 in accordance with the local legislation, other regulations based on the International Accounting Standards (IAS) and the International Financial Reporting Standards (IFRS), as well as the regulations of the relevant central banks and regulatory bodies.

In order to prepare the consolidated financial statements the individual financial statements of the dependent bank were adjusted to the presentation of the financial statements prepared based on the accounting regulations of the Republic of Serbia.

The parent bank keeps records and prepares the consolidated financial reports in accordance with the effective Law on Accounting and Audit of the Republic of Serbia (Official Gazette of the RoS 46/2006, 111/2009), Law on Banks (Official Gazette of the RoS 107/2005, 91/2010) and other relevant bylaws of the National Bank of Serbia, as well as all other regulations that apply in the Republic of Serbia.

In accordance with the Law on Accounting and Audit, legal entities and entrepreneurs in the Republic of Serbia prepare and present the consolidated financial statements in accordance with the law and professional and internal regulations, wherewith the professional regulations include the applicable Framework for the Preparation and Presentation of the Financial Statements („the Framework“), International Accounting Standards (IAS) and International Financial Reporting Standards („IFRS“), as well as interpretations that form the integral part of these standards, that is to say, the text of IAS and IFRS which is in effect, does not include the basis for conclusions, illustrative examples, guidelines, remarks, opposing viewpoints, elaborated examples or other supplementary material.

In preparing and presenting the interim consolidated financial statements January through June 2012, the Parent Bank has been using the same accounting policies and methods of calculation as in preparing the Annual Consolidated Financial Statements for 2011.

Enclosed consolidated financial statements are prepared in the form prescribed by the Instruction on the manner in which the public companies and certain persons related to them shall deliver information to the Securities Commission, pursuant to the Law on Capital Market (Official Gazette 31/2011). The prescribed set of semi-annual consolidated financial statements includes Balance Sheet – Consolidated, Income Statement – Consolidated, Cash Flow Statement – Consolidated, Changes in Equity Statement – Consolidated and Notes to the consolidated financial statements.

2.2. The Rules of Assessment

The consolidated financial statements have been prepared based on the historical value principle, except regarding the following positions:

- Financial instruments at fair value through profit or loss, evaluated at fair value;
- Financial instruments available for sale, evaluated at fair value;
- Derivatives, which are evaluated at fair value and
- Buildings, which are evaluated at revaluated value.

2.3. Functional and Reporting Currency

The consolidated financial statements of the Group are stated in thousands of Dinars (RSD). Dinar is the official reporting currency in the Republic of Serbia and the functional currency of the Parent Bank.

Functional currencies EUR from the financial statements of Komercijalna Banka AD Budva and BAM from the financial statements of Komercijalna Banka AD Banja Luka, have been translated into presentation currency and functional currency of the Parent Bank – the Dinar (RSD) based on the official exchange rates published in the Republic of Serbia.

2.5. Use of assessments

The preparation and presentation of the consolidated financial statements requires from the management of the Group to use the best possible assessments and understanding of the assumptions that affect the reported amounts of assets and liabilities, and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, as well as income and expenses in the reporting period.

These assessments and assumptions are based on historical experience, and on various information available on the date of the consolidated financial statements, which seem realistic and reasonable in the given circumstances. Based on these data, we form the assumption of the value of assets and liabilities that cannot be directly confirmed against other information. The real value of assets and liabilities can deviate from the value that has been assessed in this manner.

Both the assessments and assumptions, under which the estimates have been made, come as the result of the regular checks. If, during checking, we determine that a change in the assessed value of assets and liabilities occurred, the effects determined in such a way are recognized in the consolidated financial statements for the period when the change in assessment occurred, but only when the change in assessment affects just that particular accounting period; when the change in assessment also affects current and future accounting periods, the effects of such change are recognized both in the period when the change in assessment occurred and in the upcoming accounting periods.

Information about the areas in which the level of assessment is the highest, and which may therefore have the most significant effect on the amounts recognized in the consolidated financial statements of the Group, is provided in the Note 3.15.

3. SUMMARY OF THE SIGNIFICANT ACCOUNTING POLICIES AND KEY ACCOUNTING ESTIMATES AND ASSUMPTIONS

The consolidated financial statements present the financial reports of the Group, consisting of the consolidated financial statements of Komercijalna Banka AD Beograd, as the Parent Bank, and the following dependent and related legal entities:

- Komercijalna Banka a.d. Budva, Montenegro, 100% owned by the Parent Bank,
- Investment Fund Management Company KomBank Invest AD Beograd, 100% owned by the Parent Bank and
- Komercijalna Banka a.d. Banja Luka, Bosnia and Herzegovina, 99,998% owned by the Parent Bank.

Income Statement and Cash Flow Statement have been reclassified by applying the average exchange rate in effect in the Republic of Serbia for the first half of 2012, which came to RSD 110,8181 for one EUR and RSD 56,6604 for one BAM, and the other financial statements (Balance Sheet and Changes in Equity Statement) by applying the exchange rate in effect on the concluding date - 30.06.2012, i.e. RSD 115,8203 for one EUR or RSD 59,2180 for one BAM.

3.1. Interest income and expenses

Interest income and expenses, including the default rate and other income and expenses related to the interest bearing assets / liabilities, have been calculated on accrual basis and according the terms arising from the obligatory relationship, as specified by the contract entered into between the members of the Group and their clients.

Fee and commission income arising from granted loans has been booked as deferred income; these are recognized as the interest income for the period according to the effective interest rate (EIR) method, i.e. effective yield arising from lending.

Interest income also includes income arising from the risk hedged financial instruments, mainly based on the annuities hedged by tying the local currency to Euro or another foreign currency rate, or to the retail prices index, with the calculation at the end of each month during the repayment term and on annuity due date.

3.2. Fees and commission income and expenses

Fees and commission income and expenses are recognized based on the accrual principle.

Income arising from fees charged for the banking services and fees and commission expenses are determined once the payment falls due, i.e. when realized. In the income statement, they are recognized when incurred, or due and payable. Income arising from fees for guarantees and other contingent obligations are being accrued in accordance with the duration period and recognized in the income statement in proportion to the duration time.

3.3. Gains and losses on securities

Realized or unrealized gains and losses arising from the changes in the market value of trading securities are recognized through the income statement.

Gains and losses arising from change in depreciated value of securities held to maturity are recognized as income or as expense.

Unrealized gains and losses on securities available for sale are recognized in the revaluation reserves included in equity. In case of sale or permanent reduction in value of these securities, the related revaluation reserves previously established are included in the income statement as gains and losses arising from investments in securities.

Gains/losses arising from the stipulated foreign currency hedge clause and changes in the rate of securities available for sale, as well as the interest income on securities available for sale, are stated in the income statement.

Dividends received from investments in shares of other legal entities are stated as dividend income at the time of collection.

Impairment of the assessed value of risk by all types of securities is recognized in the income statement.

3.4. Translation of foreign currency in Financial Statements

Business transactions in foreign currency are translated into Dinars by middle rate established on the interbank FOREX market, which has been effective at the transaction date.

Assets and liabilities declared in foreign currency at the balance sheet date are translated into Dinars by middle rate established on the interbank FOREX market, which was effective on that date.

Net FX gains or losses incurred in business transactions in foreign currency and during translation of the balance sheet positions stated in foreign currency are booked as FX gains or losses.

Undertaken and contingent liabilities in foreign currencies are translated into Dinars by middle rate established on the interbank FOREX market, which was in effect at the balance sheet date.

3.5. Real estate, investment property, equipment and intangible assets

3.5.1. Intangible assets

Intangible assets are valued at cost. After the initial recognition, the intangible assets are stated at cost reduced by the accumulated depreciation and losses resulting from impairment.

Calculation of depreciation of the intangible asset will begin in the month that follows the month when the intangible assets were made available for use.

The basis for calculating depreciation consists of the cost value reduced by the remaining (residual) value. If the residual value comes out as materially insignificant, it is not taken into account in calculation of depreciation, i.e. it does not reduce depreciation basis.

The intangible assets are depreciated by applying straight-line method, with the use of 14.29 to 33.34% depreciation rate.

3.5.2. Fixed assets

// Recognition and valuation

Except for real estate, the fixed assets are valued at cost, reduced by valuation adjustment and losses resulting from impairment. As of January the 1st, 2005, the Group has adopted the method of revaluation of the real property owned by the Group members. Based on the market value assessment for the real property owned by the Parent Bank approved by the Board of Directors, the calculation of revaluation has been carried out and the value of real property was increased in 2005.

Fixed assets are initially measured at cost.

The cost value includes expenditure that can be directly attributed to an asset acquisition. Purchased software, which is an integral part necessary for the functional usefulness of the equipment, is capitalized as part of that equipment.

When parts of the fixed asset have different useful lives, they are listed as separate items (main components) of the equipment.

For the subsequent measurement of fixed assets other than real estate, after the initial recognition, the Group applies the cost value method. For the subsequent measurement of the real property, the Group applies revaluation model.

/ii/ Subsequent costs

Costs of replacement of a part of the fixed asset are recognized at book value, if the future economic benefits associated with that part are likely to flow into the Group, and if the cost of that part can be reliably measured. When spent, the spare parts and service equipment are recorded through the income statement.

/iii/ Depreciation

Depreciation of the fixed assets is calculated proportionally to the cost or revaluated value of the fixed assets, by applying the following annual rates, which have been determined to depreciate the cost or revaluated value reduced by the remaining (residual) value of the fixed assets in equal annual amounts during its useful life.

The applied annual rates of depreciation are as follows:

Buildings	2,50%
Computer equipment	25%
Furniture and other equipment	6,7%-33,33%
Investments in extraneous fixed assets	4,25%-86,20%

3.5.3. Investment property

The Group keeps investment property in order to earn income from rentals or for increase in value of capital, or both.

Investment property is initially measured at cost. Costs of transaction are not included in the initial measurement.

For the subsequent measurement of investment property, after the initial recognition, the Group applies the cost value method.

Depreciation of investment property is calculated equally at cost value of investment property, by applying the annual 2.5% rate.

3.6. Supplies

3.6.1. Supplies

Supplies are stated at cost or by net selling value, depending on which is lower.

The Group states assets acquired by collection of due credit receivables within this item.

3.6.2. Fixed assets held for sale

Assets held for sale is an asset whose book value can primarily be compensated through a sale transaction, and not through continued use.

Fixed asset is classified as fixed asset held for sale if it meets the following criteria:

- An asset (or the group of assets) is available for direct sale in its current state
- The fixed assets is planned for sale and the activities related to realization of such sale have begun
- There is an active market for such asset and the asset is actively present on that market
- The probability of sale is very high, or there is an expectation that the sale will be realized within a year starting from the day of asset classification as a fixed asset held for sale.

Fixed asset held for sale is initially valued by current (book) value or market (fair) value reduced by the costs of sale, depending on which of these values is lower. From the moment of classification of the asset as a fixed asset held for sale, calculation of depreciation for such asset stops.

If there is a change in the sales plan, the fixed asset ceases to be classified as fixed asset held for sale. In that case, the lower of the following two values is used to evaluate the fixed asset:

- Book value of the asset before it has been classified as a fixed asset held for sale, adjusted for accrued depreciation and impairment, which would have been recognized if the fixed asset had not been classified as the fixed asset held for sale, and
- Recoverable value effective at the date of the decision not to sell the respective asset.

3.7. Financial Instruments

/i/ Classification

The Group classifies its financial assets in the following categories: financial assets at fair value whose effects in changes of fair values are stated in the income statement, loans and receivables, financial assets available for sale and assets held to maturity. Classification depends on the purpose for which the funding has been obtained. The management of the Group classifies its financial lending at its initial recognition.

/ii/ Recognition

Purchases or sales of financial assets and financial liabilities are recorded using the accounting recognition at the transaction settlement date.

/iii/ Evaluation

Financial instruments are initially valued at market value, which includes transaction costs for all financial assets or liabilities other than those that are valued at fair value through the income statement. Financial assets kept at fair value, whose effects of changes in fair value are stated in the income statement, are initially recognized at fair value, and the transaction costs are declared as the operating expenses in the income statement.

Financial assets available for sale and financial assets at fair value, whose effects of changes in fair value are stated in the income statement after the initial recognition, are stated at fair value. Loans and receivables, as well as the financial assets held to maturity are measured at amortized cost using the effective interest rate method.

After initial recognition, the financial liabilities are declared at amortized cost by use of effective interest rate method, except for the financial liabilities at fair value through the income statement.

/iv/ Derecognizing

A Group Member shall remove financial asset from the books when the rights to receive cash from an asset expire, or when these rights are transferred to another person. Each right as per transferred financial assets, created or kept by the Group Member, shall be recognized as a separate asset or liability.

A Group Member shall remove liability from the books once it is settled, suspended or transferred to another person.

/v/ Valuation at amortized cost

Amortized costs of the financial assets or liabilities are the amounts by which assets or liabilities are initially valued, reduced by principal repayment, plus or minus the cumulative amortization using the effective interest

rate method on the difference between the initial value and face value at the instrument maturity date, reduced by impairment.

/vi/ Valuation at fair value

The fair value of financial instruments is the amount by which the asset can be exchanged, or liability settled, between knowledgeable, willing parties in an arm's length transaction.

The available market information at the reporting date and other models of valuation the Group Member is using determine fair value.

Fair value of certain financial instruments declared by nominal value is approximately equal to their book value. These instruments include cash, and receivables and payables with no agreed maturity, or the agreed fixed interest rate. Other receivables and liabilities are reduced to their currency value by discounting the future cash flows with the use of current interest rates. The management believes that due to the nature of the Group's business and its general policies, there are no significant differences between the book and fair value of the financial assets and liabilities.

The fair value of irrevocable loans and off balance items is the same as their book value.

/vii/ Impairment

Group's financial assets are estimated at the balance sheet date, in order to determine whether the objective evidence of impairment exist. If there is evidence of impairment, the recoverable amount of the loan is determined. In order to manage the credit risk adequately and efficiently, in the scope of its internal regulations, the Group has prescribed specific policies and procedures for the identification of bad assets and management of such assets.

The management of the Group evaluates recoverability of receivables, i.e. impairments of loans and advances based on the individual assessment of doubtful receivables. Doubtful receivables include all claims with default repayment. Members of the Group evaluate the recoverable amount of receivables and loans, bearing in mind the regularity of payments, financial state of the debtor and quality of the collateral, as well as the agreed cash flow and historical data on losses.

Members of the Group calculate the impairment cost that shows in the expense side for the period when the impairment occurred. If, in the following periods, the management determines that conditions changed in the sense that impairment no longer exists, previously impaired asset will be suspended in favour of the income side. Suspension of impairment cannot result in higher value of the asset in question than the value such asset would have if there had been no impairment.

3.8. Loans

Loans are stated in the balance sheet up to the amount of granted lending, reduced by the principal amount repaid, and by the valuation adjustment based on the estimate of specifically identified risks related to certain loans and risks for which the experience shows should be included in the loan portfolio. In assessing these risks, the management uses methodology based on the full application of IAS 39, disclosed in the Note 3.15.

Dinar loans hedged by binding the local currency to exchange rate of Euro or other foreign currency, or the retail price index, are revaluated in accordance with the specific contract for each loan. The difference between nominal value of the outstanding principal and revaluated amount is stated within the position of receivables

arising from loans and advances. The effects of this revaluation are recorded in the position of income and expenses from changes in value of assets and liabilities.

3.9. Financial Assets

3.9.1. Financial assets at fair value whose effects of changes in fair value are recognized in profit or loss

Financial assets at fair value whose effects of changes in fair value are recognized in the profit&loss are the financial assets held for trading. The financial asset is classified in this category if it has been acquired primarily for sale in the short term. Derivatives are also classified as the assets held for trading, unless identified as the hedging instrument. We classify assets in this category as current. The financial assets at fair value whose effect of changes in fair value are recognized in the profit&loss include old FX savings bonds issued by the Republic of Serbia and shares of banks and companies acquired for trading.

3.9.2. Financial assets held to maturity

Financial assets held to maturity are non-derivative financial assets with fixed or determinable payments and fixed maturity terms, which the Group Members intend to hold and can hold to maturity. These financial assets include obligations of legal entities and govt. T-bills of Montenegro.

In case a member of the Group decides to sell a considerable portion of financial assets held to maturity, the entire category is reclassified as available for sale. Financial assets held to maturity are classified as long-term assets, unless the maturity terms are shorter than 12 months as at the balance sheet date, in which case they are classified as short-term assets.

Financial assets held to maturity are initially recorded at cost value, and at the balance sheet date these are recognized at amortized value, i.e. current value of the future cash flows determined by use of the effective interest rate contained in the instrument.

3.9.3. Equity investments and other financial assets available for sale

Financial assets available for sale are non-derivative financial assets that are designated as available for sale and not classified as loans and receivables, financial assets held to maturity or financial assets at fair value whose effects of change in fair value are recognized in the profit or loss. Financial assets available for sale are investments intended to be kept for an indefinite period, which can be sold because of the liquidity requirements or change in interest rates, foreign exchange rate or market prices. If there is no active market for the financial assets available for sale, or if these assets bear fixed maturity term, the financial assets available for sale are evaluated at amortized value using the effective interest rate method. The financial assets available for sale consist of T-bills and bonds issued by the Republic of Serbia, shares of other banks and stakes in other legal entities.

Financial assets available for sale are initially estimated at cost value, and at the balance sheet date at market value, if known. Change in market value is recognized in the capital position, credited or debited to revaluation reserves, until the disposal of these financial assets, when revaluation reserves are transferred to income.

In terms of share in equity, there is the intention to hold indefinitely. These shares can be sold depending on the liquidity requirements or in case of change in market prices. If there is no active market for a share in equity, it is valued at cost.

3.10. Cash and cash equivalents

In the Cash Flow Statement, the position cash and cash equivalents includes cash, funds deposited on the accounts of other banks and cheques presented for collection.

3.11. Funds managed on behalf and for the account of third persons

Funds managed by the Group members for the fee on behalf and for the account of the third persons are not included in the Group balance sheet, but in the off balance positions.

3.12. Taxes and Contributions

3.12.1. Corporate Profit Tax

Profit tax is the amount calculated by use of the prescribed tax rate to the profit amount before tax, stated in accordance with the IAS / IFRS, after deduction of the effects of permanent differences that reduce the prescribed tax rate to an effective tax rate.

The Parent Bank has no possibility of exercising fiscal consolidation based on the regulations effective in the Republic of Serbia.

The Group Members determine the final amounts of tax liabilities arising from profit by applying the tax rate on the tax base established by local regulations.

Tax rates for 2012 are as follows:

Serbia	10%
Montenegro	9%
Bosnia and Herzegovina	10%

3.12.2. Taxes and contributions not related to the corporate business result

Taxes and contributions that are not related to the company's business result include property tax; value added tax, tax contributions on wages paid by the employer, as well as other taxes and duties in accordance with the state, local and tax regulations. These taxes and contributions are stated in the OPEX.

3.13. Deposits

Deposits are stated up to the amount of deposited funds, which can be increased by accrued interest, depending on the obligatory relationship established between the depositor and member of the Group. Members of the Group have stipulated the interest rates on deposits depending on the amount of a deposit.

FX deposits are stated in Dinars according to the middle rate of the deposit currency effective at the balance sheet date.

Deposits are stated in the balance sheet as transaction and other deposits.

3.14. Capital

Capital of the Group includes the initial capital, shares of the subsequent issues, reserves from profit, revaluation reserves, retained earnings and current earnings reduced by unrealized losses on securities available for sale.

Capital of the Group was formed with the funds invested by the founder- the Parent Bank and minority founder of Komercijalna Banka AD Banja Luka in cash. The founder cannot withdraw the funds invested in the capital of the Group.

3.15. Key accounting assessments and assumptions

Management makes assessments and assumptions that influence the value of assets and liabilities in the subsequent fiscal year. Estimated values are rarely equal to achieved results. Assessments and assumptions that involve the risk of significant material corrections of the book value of assets and liabilities in the coming fiscal year are stated below.

/i/ Credit loss reserves

The Group reviews its accounts receivable and other investments in order to assess the credit loss reserves and impairments on a monthly level. In determining whether the losses arising from the impairment of receivables and other investments should be recognized in the profit&loss, members of the Group assess if there is information / evidence that suggest the existence of a measurable reduction of the estimated future cash flows on the group level, before such losses can be identified on the level of a single account receivable, i.e. loan. Information that can indicate losses arising from receivables and investments include irregularity and delay in settlement of obligations, market and economic conditions on the local level, which cause delay in settlement of obligations etc. Management's assessments on impairment of receivables and other investments by estimating the future cash flow are based on the real losses from the previous periods, which were realized on the financial assets with a similar risk and similar impairment reasons. The methodology and assumptions, which make the starting point for defining the amount and period of cash flow from loans and other investments, is the subject of regular reviews in order to minimize the differences between loss estimates and actual losses.

The impairment assessment procedure is carried out specifically, for each materially significant loan, and on the group level, for less materially significant loans. The impairment amount is assessed individually, as a difference between the book and current value of the expected future cash flows, determined by discounting, by applying the effective interest rate of a loan in question.

Impairment of the less materially significant loans is assessed at the group level for each credit rating group separately, bearing in mind their similar features in terms of credit risk, and to the level of migration percentage of the corresponding credit rating group into the V credit rating group adjusted by the percentage of the collection of loans which were classified into the V credit rating group.

If, when assessing the specific materially significant loans, a conclusion is made that no objective evidence exist to impair these loans, devaluation of such loans will be carried out in the percentage of impairment of the credit rating group to which they belong.

The methodology and assumptions, which serve as the starting point when defining the amounts and periods of cash receivables from loans and advances, undergo regular checks in order to minimize differences between estimated and actual losses. The amounts of expected loan inflows are estimated based on the evidence of projected revenues of the debtor, and if insufficient, the estimate of the cash flow from exercising the collateral. The assessment of default days for collection of certain claims from the debtor, are determined by identifying all the relevant evidence concerning the periods of the debtor's projected net income, as well as historical data about the default in payment of the debtor in question.

/ii/ Fair value

Determining the fair value of financial assets and liabilities for which there is no market price requires the use of different models and techniques. Concerning the financial instruments that have less trading volume and whose market prices are therefore less transparent, determination of the fair value is more subjective, i.e. requires higher level of assessment depending on the liquidity of the instrument, concentration of risk, market uncertainties, assumptions regarding the price and other factors that affect the specific financial instrument.

3.16. Employee benefits

In accordance with the regulations, the Group Members are obligated to pay contributions to the state funds in order to insure social security for the employees. These obligations include contributions for employees paid by the employer in an amount calculated at the rates prescribed by the relevant legislation. Members of the Group are also obligated to reduce the gross salaries of employees by the amount of contributions, and to make payments to the funds referred to above on behalf of the employees. Contributions paid by the employers and contributions charged to the expense of the employee are booked to the expense side of the period they refer to.

The Group has no own pension funds or options to make share payments to employees, thus it has no identified liabilities on that basis as of June the 30th of the current year.

The Group allocated the provisions in 2011 according to the IAS 19 for a part of increase in long-term liabilities for retirement benefits and increase in obligations for unused days of vacation of the employees.

3.17. Information by segments

The Group conducts most of its business on the territory of the Republic of Serbia.

The balance sum of the Parent Bank comes to 92.22% of the total consolidated balance sheet sum (2011: 92.25%).

The balance sum of Komercijalna Banka AD Budva is 3.35% of the total consolidated assets (2011: 3.24%), Komercijalna Banka AD Banja Luka 4.40% (2010: 4.48%) and KomBank INVEST 0.03% (2011: 0.03%).

During consolidation, we eliminated all mutual relationships from the balance sheet, in total amount of RSD 5.924.886 thousands (2011: RSD 5.690.480 thousands). Income was eliminated from the balance sheet amounting to RSD 2.971 thousands (2011: RSD 165.859 thousands), and RSD 28.722 thousands were eliminated from expenses (2011: RSD 46.767 thousands) – Note 7.

Segmented information is disclosed in the Note 6.

5. CAPITAL ADEQUACY AND PERFORMANCE INDICATORS COMPLIED WITH THE LAW ON BANKS

Capital adequacy

The Group's capital adequacy, according to the NBS methodology, amounts to 16.93% on June the 30th 2012. The Group is obliged to adjust its business scope with the parameters prescribed by the Law on Banks. As at 30.06.2012, all the indicators were complied with the requirements.

Parent Bank is required to maintain the minimum capital adequacy ratio of 12%, as determined by the National Bank of Serbia pursuant to the Basel Convention applicable to all banks. The capital adequacy ratio of the Parent Bank as at June the 30th 2012, calculated based on the financial statements, amounts to 15.50% when applying effective decisions of the National Bank of Serbia for 2012. As at 30.06.2012, all indicators were adjusted with the prescribed parameters.

Komercijalna Banka AD Budva is required to maintain the minimum capital solvency ratio of 10%, as determined by the Central Bank of Montenegro. The solvency ratio as at 30.06.2012, calculated as the ratio of total risk capital amount and total weighted assets, amounts to 38,28% according to the methodology of calculation prescribed by the Central Bank of Montenegro. As at 30.06.2012, all the indicators were complied with the prescribed parameters.

Komercijalna Banka AD Banja Luka is required to maintain the minimum capital adequacy ratio of 12%, as determined by the Banking Agency of Republika Srpska. As at 30.06.2012, the capital adequacy ration amounted to 27.04%. As at 30.06.2012, all the indicators were complied with the prescribed parameters.
